PREMIUM 5% LIDO-PRILOCAINE CREAM

Most Commonly Used Local Anesthesia

Lidocaine

Applied variously according to the contents and form:
Liquid, spray, cream, ointment, gauze, etc.

Prilocaine

Anesthesia Used Often in Dentistry through Injection
Similar properties as lidocaine, but less toxic and excretes faster, and therefore safer

Suitable for All Cosmetic Treatments with Quick Numbing Effects.

VARIOUS APPLICABLE TREATMENTS

Dermatology

Urology

Surgery

Aesthetic

Tattoo
